

Here at Alan Nuttall Ltd where we take the welfare of our employees very seriously, we have been using the services of WHC Hire Services for the last two years, in particular they have been carrying out Hand Arm Vibration Monitoring (HAV) on a regular basis, we have found them to very efficient and helpful; and nothing is too much trouble for them. Their service is second to none.

I have recommended their services to other companies which I would not do if I was not impressed with them, the system they employ for the HAV monitoring is state of the art, and the results are given to us in a easy to understand format, WHC give full training and back up service to this monitoring, and in today's economical environment this company does not charge extortionate prices for their services, this has given me the opportunity to use WHC throughout the Alan Nuttall group.
